Back ARAE-1

Enable students to upload project submissions and have them automatically queued for grading

+ ...

Description

covers intake pathway for student project submissions, file upload, validation and queuing for execution. This is the entry point that feeds the automated test-and-score engine.

Includes handling of submission timestamps and queue management. Maps to FR-002 AND FR-001

Child work items

ARAE-2

Automated Test Execution & Rubric Scoring

+

...

Description

Covers the automated grading engine: runs unit tests on queued submissions, generates rubric-based scores, flags execution failures, and supports up to 100 concurrent submissions without dropped items or memory issues. Maps to FR-001, FR-005, and NFR-001.

Allow students to view their rubric score breakdown and submission status

+ ...

Description

Covers the student-facing display of grading outcomes, including rubric score breakdowns, test results, and execution-error status where applicable.
Ensures students receive accurate, up-to-date visibility into their submission's evaluation state. Maps to FR-003 (view results).

Child work items

100% Done

Work	Prio...	Story ...	Assi...	Status

Allow faculty evaluators to review and override automatically generated rubric scores

+ ...

Description

Covers the faculty-facing capability to review auto-generated scores and manually correct them where automated grading is inaccurate. Includes data integrity safeguards ensuring score changes are persisted reliably and no grade is lost or silently altered without an audit trail. Maps to FR-004 (override) and NFR-002 (data integrity)

REFLECTION QUESTIONS

1. Did your estimations reflect the actual effort?

Yes, story points matched the effort needed, simple tasks had fewer points , while complex tasks had more.

2. Was your backlog well-prioritized?

Yes, core important features were planned first following which lower priority features were planned.

3. How did your simulated sprint align with your plan?

The sprint followed the plan, tasks were split and completed across sprints, since this was just a simulation, the tasks were completed relatively quickly.

4. What insights did the burndown chart give about your team's capacity?

Chart showed workload decreased as the week crept to an end, showing that the team was well within the deadline to complete each sprint.
